2018 MORRIS CENTER FOR UROLOGIC RESEARCH LECTURESHP

The Morris Center for Urologic Research was established in 2001 with support from the E.A. Morris Charitable Foundation. Since inception, the Morris Center for Urologic Research has stimulated interest in genitourinary disease within Duke University Medical Center via granting mechanisms and seminar discussions. Innovative programs have been initiated and faculty recruitment has been supported. The primary focus of this effort has been to promote a better understanding of urological cancers and associated conditions. The Morris Center Lectureship is dedicated to this purpose.

Presented by EILA C. SKINNER, MD

Dr. Skinner is the Chair of the Department of Urology at Stanford University and the Thomas A. Stamey Research Professor of Urology. She obtained her urologic training at Los Angeles County Hospital/USC School of Medicine and completed a fellowship in urologic oncology under Dr. Donald Skinner at USC Norris Comprehensive Cancer Center. She was on the faculty at USC from 1990 through 2012 when she was recruited to Stanford.

Dr. Skinner’s research and clinical practice are focused on understanding the natural history of bladder cancer and refining treatments for high-risk non-muscle invasive and invasive bladder cancer, along with urinary tract reconstruction and continent urinary diversion. She was a member of the AUA Guidelines Committees on non-muscle invasive bladder cancer in 2008 and 2016 and is a trustee of the American Board of Urology.
